

Sunrise Endocrine Clinic

Endocrinology follow-up note

Patient: Ramesh Mehta DOB: 1952-03-11 Sex: Male ID: ELD-2026-014
Encounter date: 2026-06-02

Reason for visit

Quarterly diabetes review for type 2 diabetes, hypertension, diabetic kidney disease, and diabetic neuropathy monitoring.

Symptoms and home history

Patient reports burning feet at night, numbness in toes, fasting sugars often between 142 and 168 mg/dL, and occasional dizziness when lunch is delayed. Daughter confirms the evening walk is now more consistent.

Assessment

Type 2 diabetes is improving but remains above goal. Albuminuria persists. Kidney function is stable but still needs repeated monitoring. Neuropathy symptoms remain mild.

Plan

Continue metformin XR, sitagliptin, telmisartan, rosuvastatin, and daily foot checks. Repeat HbA1c, creatinine, eGFR, urine ACR, and potassium in 8 weeks.

Next appointment

Endocrinology follow-up appointment booked for 2026-07-18 for diabetes and kidney care. Bring sugar log, blood-pressure readings, and all medicine packets.
