Sports Physiotherapy Progress Note

Patient: Alex Morgan DOB: 1991-08-14 Sex: Male Patient ID: SYN-2025-001
Collection / encounter date: 2025-06-19

Related episode: Right ankle inversion injury, 04 June 2025

Pain reduced from 7/10 to 2/10. Swelling minimal. Walking without limp. Dorsiflexion remains 8 degrees less than left. Single-leg balance 18 seconds right versus 35 seconds left.

Plan

- Continue ankle mobility and calf stretching daily.
- Peroneal and calf strengthening three sessions weekly.
- Balance/proprioception progression.
- Gradual return-to-run protocol when single-leg hop is pain-free.
- Four further weekly sessions; orthopaedic review only if progress plateaus.
